

The CHENEY a Violinist's Inspiration

The Violin Resonator

The vibrant, stirring quality of violin tones is here imparted to all music reproduced with The Cheney.

The use of time-seasoned violin wood, carved into this familiar form, assures mellowness and resonance.

"THE LONGER YOU PLAY IT,
THE SWEETER IT GROWS."

The beautiful tones of a violin inspired the invention of a remarkable instrument, reproducing all musical selections with unrivalled purity and richness of tone.

Every principle embodied in The Cheney is musical. Its reproduction eliminates unmusical sounds, and rounds out the full tonal value of all records, enhancing their beauty.

Cheney cabinets are greatly admired for their exact portrayal of the period designs originated by old world furniture craftsmen.

Would Build Shells Weighing Two and a Half Tons

(INTERNATIONAL NEWS SERVICE)

LONDON.—Britain's resort to the French 150-millie gun is an intimation from Sir Robert Hudson, the great steel manufacturer, that he is prepared to build shells weighing two and one-half tons, twenty-one inches in diameter, capable of perforating two and a half feet of hard-faced armor at a distance of ten miles. The shells can be constructed if a gun is found capable of firing them.

The largest gun thus far is the "Woolwich Infant," weighing 150 tons, firing

an eighteen-inch shell weighing one ton nine hundred weight.
